

LABEL 13

Coloured marker spikes with pen

Sold in packs of 10, these yellow plant labels are used to name all the plants in your garden. They will help you keep track of your plants and also teach your children, for example, the names of plants, fruits, and vegetables.

Benefits

It is advisable to use a permanent marker for labeling, so the names written on the board will not wash off due to watering or rain. The labels can be inserted into the ground. A great tool to teach your children or grandchildren the joy of gardening and the names of plants. You can also indicate the planting date. Reusable for several years. The writing can be removed with alcohol. UV resistant, thus withstanding sunlight and weather conditions.

Characteristics

Material: PP (polypropylene)
